

What Percentage of Students Are Currently Not Succeeding
in My Classes?

	Class 1	Class 2	Class 3	Class 4	Class 5
Number of students with average below 60 (failing)					
Number of students in class					
% of students failing					

Reflection Questions About Students Who Are Not Succeeding

What are the main reasons these students are not succeeding?

What steps do these students need to take to be able to pass this semester?

What supports do these students need to help them recover?

For how many of your students is it already too late to pass this semester?

What interventions have you tried with students who are failing? Why are they not working for those still failing?

What recovery options have you given students this year? What impact did they have? If you have not yet included recovery options discussed earlier in the year, how might that impact student success?
